- Good writing, communication, interpersonal skills and desiring to learn new technologies and
Able to implement them
Worked on web servers like Apache and application servers like Tomcat to deploy code.

Academic Details:

Bachelor of Computers from **Andhra University**.

Professional Experience:

Working as **Java Developer** at **emids Technologies**, Bangalore from June 2020 to till date.

Technical Skills:

Languages	:	Java
JEE Technologies	:	Jdbc, Servlets and JSP
Frameworks	:	Spring, Hibernate
ORM Tool	:	Hibernate, Data JPA
SCM	:	GIT, GitLab
IDE	:	Eclipse, Spring Tool Suite
Cloud Services	:	Amazon Web Services (AWS)
Operating Systems	:	Linux (Red Hat), Windows, Ubuntu.
Web Server Administration	:	Tomcat
Version Control	:	Git, GitHub, GitLab, SVN
Operating System	:	Windows, Linux

Significant Projects Handled:

Project 1#

Project : Seva supply chain
Duration of Project : Sep 2021 to till date.
Role : Java developer.

Tools : Java 8, Spring Boot, RestAPI, Hibernate ,GIT, Oracle 11g, Spring, Maven Microservices.

Roles and Responsibilities:

- Worked in Agile methodology.
- Understanding, analyzing & implementing user stories.
- Preparing high level design documents.
- Worked on microservices
- Written Junit test cases using Mockito.
- Developed Spring RESTFul web services.
- Worked on spring data jpa .
- Implemented micro services
- Worked on GIT Maven.
- Deployed the application on tomcat.
- Responsible for Bug Fixing.
- Used JIRA tool for Agile.

Project 2#

Project : EURES (European Commissioners Employment Services)
Client : European Commissioners (Belgium)
Duration of Project : June 2020 to July 2021
Role : Java developer.
Tools : AWS, Git Java 8, Spring Boot, Rest, Data JPA, Hibernate 5.0,GIT,

Description:

The EURES Portal is a live employment related portal of the European Commission. The phase-I project is currently on, this phase of the project involves the takeover of the project from the previous contractor. This project is divided into 3 important sub projects of a) The EURES Portal b) The Job Search Engine and c) LPES (Local Public Employment Services) applications. The scope of the portal also involves providing employment related content for the benefit of all member states in the 25 different languages. The portal section of the project is executed using Java JSP based on Spring Framework. Hibernate is used for mapping to the MySQL Database that is used as the backend.

Roles and Responsibilities:

- Followed **Agile** Software Development with **Scrum** methodology
- Involving in project modules design and implementation
- Developing **Rest API** for UI application
- Actively participated team meetings and status calls
- Involved in Analysis, Design, Coding, and testing phases of the project management

- Engaged in development of new features, bug fixes and deployment
- Written test cases using **Junit** and **Mockito**
- Involved in writing user defined exceptions
- Integrated external authenticated Rest API using Rest Template
- Involved in developing components in angular and integrated with backend services
- Developed GUI for the entire project requirement
- Taken care of Coding and unit testing activities for all the functionalities
- Involved in HLD, DDD and Unit test logs for all the java code and documented in the Lowes KR portal.
