## Experience Summary:

- Over 2.7 years of experience in analysis, development and delivering the application using technologies such as Core Java (OOPS, Exception Handling, Collection framework), J2EE (Servlets, JSP, Struts), JavaScript, jQuery, UNIX system.
- Perform unit testing, peer review, review/refactor code, and deploy application into application server.
- Involve in process improvement activities by providing inputs at technology format and deliverables.
- Researches available open-source technologies, tools and emerging technologies to provide extensive solutions, analytical, problem solving techniques to application systems.
- Provide post production support to the system and provide extensive solutions to the issues arising in the system.
- Improve overall quality of the delivery in particular testability, supportability, portability, security, efficiency, robustness of applications.
- Produce a remarkable amount of high-quality work, identifies and implements to enhance the output.
- Defect tracking and prevention by performing analysis to log defects and provide resolution.
- Excellent communication Skills and a good team player
- Carry positive attitude towards learning, initiative, energy and perseverance.

## Technical Skills:

| Hardware | Software Products | Tools |
|---|---|---|
| Windows, Unix | JAVE/J2EE (Core Java, Servlets, JSP, Struts), SQL, PL/SQL, Oracle, JavaScript, C, C++, C#, Asp.Net, PHP, HTM, Application Servers (BEA WebLogic 7.0), Web Servers (Apache Tomcat 5.0) | MS-Office, Eclipse, control-M, Notepad++ |

**Qualification:** B. TECH (MECHANICAL) from ARYAN INSTITUTE OF ENGINEERING AND TECHNOLOGY BHUBANESWAR (BPUT), 2017

**Strength:**

- Having good communication skills.
- Hard working and good team player.
- Carry positive attitude towards learning, initiatives and energy.
- Sincere, disciplined and self-motivated.

**Career Profile:**

| Dates | Organization | Role |
|---|---|---|
| From Jun-2020 to till date | Moonstone Info Tech Private LTD, Hyderabad, India | Java Developer |

**Personal Details:**

| | |
|---|---|
| Date of Birth | June 2nd 1994 |
| Marital Status | Single |
| Nationality | Indian |
| Language Known | English, Hindi, Oriya |
| Current Location | Hyderabad, India |

**Project Details:**

**PROJECT Title:** Code Comparison Tool

**Duration**: Jun'20 – Till Date

**Client Name: Kotak Mahindra Bank**

**Current Work Location**: Hyderabad, India

**Job Title:** JAVA developer

**Project Description:**

Code Comparison tool performs language agnostic security & vulnerability check of applications (UNIX/WINTEL/Database) using raw code analysis. All the applications in system should be on-boarded into this tool and respective jobs would be running in control-M server. It compares base line code with new changes rolling out to production. It sends email alert to application owners if any differences arise in production system. Application owner should log in to Code Comparison tool, validate the differences and able to close it.

**Roles and Responsibilities:**

- Working as a Java developer, analyze the requirements by understanding business use cases and system design documents.
- Involve in the end-to-end development of code comparison application covering all phases of SDLC including requirement gathering, analysis, technical design, build/construction of code, perform unit and integration testing, code review and refactor, deployment of application into server.
- Involve in process improvement activities by providing inputs both at technology format and deliverables.
- Provide post production support such as defect tracking and prevention by performing analysis of logs and provide solution for it.

**Technologies:** Java, J2ee, WebSphere application server, SQL, Oracle, JavaScript, MAVEN
**Tools**: Eclipse, Beyond Compare, SQL developer client, control-M, WINSCP and Putty
